- ▶ Full graphic packaging with identifiable icons supports the quality of the Worldparts new water pumps in three languages.

## New Water Pump

Parts That Fit Your World

## New Water Pump

### Precision Design

Computerized machined surfaces for proper fit and sealing.

## Pre-assembled Water Pumps and Housings

Worldparts® offers more water pumps with back housings than any other aftermarket manufacturer. Inclusion of the back housing allows the technician to replace the entire assembly with one unit – and order one part number for the complete replacement. Water pumps with back housings also reduce installation time and ensure trouble-free operation with reduced warranty claims or comebacks.

#### Water Pump Added Benefits:

- ▶ New pumps manufactured to ISO TS16949 standards
- ▶ 100% fully tested unitized bearings/seals
- ▶ Computerized machined surfaces for proper fit/sealing
- ▶ 100% inline quality tested

## Parts That Fit Your World

### Water Pump Coverage For More Than 97% of Today's Hybrid Vehicles

Worldparts® covers the market for hybrid-vehicle water pumps with the most complete coverage from one aftermarket source. Proven-quality, precision built Worldparts water pumps deliver OE exact fit and function, and include back housings for appropriate applications. Our coverage includes nearly every hybrid car and light truck in operation.
